AMIRHASSAN CHARVADARI

Artificial Intelligence Engineer & Entrepreneur

amrchrv@gmail.com | +90 536 728 9770 | Eyupsultan, Istanbul, Turkiye | linkedin.com/in/amircharvadari | amirc.me | github.com/amircharvadari

PROFILE

Final-year Artificial Intelligence Engineering student at Bahçeşehir University with a multidisciplinary academic background in medicine and artificial intelligence. Combining technical knowledge in Python, machine learning, cloud technologies, and AI-powered automation with entrepreneurial experience in product development, team leadership, marketing, and business operations. Brings a multidisciplinary perspective to problem-solving, with an interest in developing innovative technology solutions that create practical value.

EDUCATION

Bachelor of Engineering in Artificial Intelligence 2023–2027 (Expected)
Bahçeşehir University

Minor in Engineering Management 2026–2027 (Expected)
Bahçeşehir University

Medical Studies 2020–2022
Erciyes University

EXPERIENCE

- Lead a four-person team across product, technology, and marketing operations.
- Oversee the company's technology stack and go-to-market strategy.
- Managed approximately $2,000 in marketing and SEO expenditure over four months, contributing to TRY 1 million in revenue within three months.
- Led educational content strategy and advised 300+ clients over four years.

PROJECTS

Bookstore API | 2025
Developed a RESTful API for bookstore management using Flask and MongoDB. Containerized the application with Docker and deployed it using Kubernetes for scalable deployment.
Technologies: Python, Flask, MongoDB, Docker, Kubernetes

WhatsApp AI Agent | 2026
Developed an AI-powered WhatsApp assistant using n8n and OpenAI GPT-4o. Integrated Pinecone-based Retrieval-Augmented Generation (RAG), Google Calendar, and automated daily reporting workflows.
Technologies: n8n, OpenAI GPT-4o, Pinecone, RAG, WhatsApp API, Google Calendar API

Reliable MLOps Pipeline for AI Model Deployment | 2026 – Present
Developing an end-to-end MLOps pipeline with data versioning, experiment tracking, automated testing, CI/CD, and containerized model deployment. Designing model validation, performance monitoring, and controlled retraining workflows.
Technologies: Python, scikit-learn, MLflow, DVC, Docker, FastAPI, GitHub Actions, pytest

Intelligent Query Filtering for Efficient RAG Systems | 2026 – Present
Planning an intelligent RAG system that uses a decision model to route queries between document retrieval and direct LLM responses. The project aims to optimize response quality, latency, and computational cost through adaptive query routing.
Technologies (Planned): Python, LLMs, RAG, Vector Databases, Query Routing

SKILLS

Technical Skills: Python, SQL, MongoDB, Microsoft Azure, LangGraph, n8n, Streamlit, Vercel, Docker, C++, GitHub, R
Soft Skills: Leadership, Team Collaboration, Technical Mentorship, Interpersonal Communication, Stakeholder Communication

CERTIFICATIONS

- Artificial Intelligence on Microsoft Azure - Microsoft, 2025
- Introduction to Microsoft Azure Cloud Services - Microsoft, 2025
- Deep Learning and Reinforcement Learning - IBM, 2026
- Exploratory Data Analysis for Machine Learning - IBM, 2026
- Unsupervised Machine Learning - IBM, 2026
- Microservice Architectures - Vanderbilt University, 2025

LANGUAGES

English (Fluent), Persian (Native), Turkish (Native), Azerbaijani (Native)

HOBBIES & INTERESTS

Gym and fitness, reading books on business, psychology and entrepreneurship, Professional networking
